Grade: 4 | Term 1, Week 13 (23 Nov to 27 Nov) | TCD: Future Skills 4: Design, Tools and Simple Solutions | Session length: 1 hr 30 min

T1 WEEK: 13	**Lesson 1: Final Challenge and Demo**
Standard(s):	Technology: design, test and explain algorithms; ELA: SL.4.4 (report on a topic with clear, relevant facts)
Literacy Strategies:	Demo script frame: Our challenge was ... We used a function for ... It saved ... blocks. One bug we fixed was ...
Assessment:	Challenge course completion; demonstration with explanation; peer feedback; live quiz on the TCD website (counts towards the Matatalab Pro project certificate).
WALT (Learning Target):	We are learning to combine everything we know to solve a challenge and explain our code to others.
WILF (Success Criteria):	I can complete the challenge course using loops, functions and angle blocks. I can explain how my function made my code shorter. I can demonstrate my program clearly to the class. I can give kind and useful feedback to another pair.
Targeted Vocabulary	challenge, demonstrate, efficient, loop, function, angle, feedback
Resources	Matatalab Pro Sets, Challenge course mats with checkpoints, Obstacles, Demo script cards, Peer feedback cards, Timer Accompanying resource: Grade4_Week13_Presentation.pptx (slides, hook video and live quiz code on the TCD website), Grade4_Week13_Worksheet and Grade4_Week13_Lesson_Plan.
National Identity Integration	Link to the UAE's focus on future skills and robotics, such as the robots used at Expo City Dubai and in UAE smart services.
AI/Digital Learning	Matatalab Pro Sets; hook video; live quiz on the TCD website.
Direct Instruction: I Do	Explain the challenge course and rules (slide 6). Recap the best tools (slide 7) and model a short demo using the script (slide 8).
Guided Practice: We Do	Class agrees the success criteria for a good demonstration. Pairs read the course card and plan the route together (slide 9).
Independent Practice: You Do	Pairs complete the challenge and practise their demo (slide 11). Pairs demonstrate to the class; listeners fill in a peer feedback card (slide 12). Live quiz on tablets (slide 13).
Differentiated Instruction: Beginning / On / Above	**Beginning: Complete checkpoints 1 and 2 with a planning sheet; use the demo script card.** **On: Complete all three checkpoints using a loop and a function.** **Above: Complete all checkpoints in under 15 blocks and explain two different ways to solve it.**
Closure/Reflection	Celebrate the smartest codes. Exit ticket: what did you learn about coding in this project? (slide 14)
Inclusion / EAL Support	☑ Visual Supports ☐ Chunked Instructions ☐ Reduced Language Load ☐ Model / Worked Example ☐ Pre-teach Vocabulary ☐ TA/LSA Support ☐ Other: ☑ Extra Processing Time ☐ Text Read by TA/LSA ☑ Flexible Grouping ☐ Assistive Technology ☐ Movement / Sensory Break ☑ Scaffold / Sentence Starters

G&T / Extension	☑ Extension / Challenge Task ☐ Real-World Application ☐ Higher-Order Questioning ☐ Curriculum Compacting ☐ Depth & Complexity Task ☐ Above-Grade-Level Texts ☐ Independent Inquiry ☐ Student-Led /Passion project ☑ Leadership / Peer Coaching ☑ Open-Ended Task ☐ Other: _____
